

BUILDING PRODUCTS

A HANLEY-WOOD, INC., PUBLICATION

JANUARY/FEBRUARY 1998

Builders Accessories. The 2100 and 3100 acrylic block window series are 35 percent more energy efficient than comparable glass block products, the firm says. The 2100 series aluminum frame and the 3100 series thermal-break frame windows are manufactured with Plexiglas acrylic resins to make them more impact resistant and 80 percent lighter than other glass block products, the maker says. The blocks, which allow 92 percent of light transmission, come ready to install in white, bronze or tan leak-proof frames. 602-921-7085. Circle 283.
