FOR IMMEDIATE RELEASE

ANOTHER GLASS BLOCK WINDOW? ... A BETTER GLASS BLOCK WINDOW!

PHOENIX, AZ, - May 28, 2004 – Offering over 30 years of manufacturing and distribution experience in the window industry, the owner and founder of Builders Accessories, Sam Regina, introduces his innovative design of a **NEW lightweight glass block window system**. Added to their well-established Crystal View™ block window systems product line this new prefabricated glass block window promises to answer the call from many custom builders and designers for a well-designed real glass block window. As the conventional method of installing individual glass blocks at the jobsite dwindles, more and more manufactures are attempting to prefabricate glass block windows, many with questionable success.

The Crystal View™ glass block window offers a **vinyl-clad hybrid frame** with an aluminum sub frame and structural vinyl spacers for increased strength and a sleek design. A new lightweight two-inch glass block and mechanically mitered corners assist in making this glass block window much lighter than thicker glass block windows and gives better resistance against structural corner failure common in vinyl welded units. Available in several eight-inch block configurations in white, almond and clay frame colors this new glass block window is an exciting addition to the Crystal View™ block window systems product line.

Builders Accessories' Crystal View™ glass block windows are available through authorized dealers and certified manufacturers throughout North America and Europe. Lightweight and prefabricated for easy installation, these strong glass block windows are perfect for all types of installations. For more information about the new Crystal View™ glass block window, and other specialty window products available through Builder Accessories, contact Erick Felsch, Sales and Marketing Director, Builders Accessories, Inc., 3621 East Wier Avenue, Phoenix, AZ 85040.
